

Did you know that the SA Government subsidises IVF treatment?

Public Contract:

Repromed is the only Assisted Reproductive Technology (ART) unit in South Australia offering IVF under the SA Government public contract. The SA Government provides funding for SA patients undertaking IVF treatment by subsidising the day surgery fees.

Uninsured patients have the day theatre fees for an egg pickup covered under this public contract.

If you would like your patients to be considered, please ask them to speak to a Repromed doctor during their consultation.
